CONFIDENTIAL/US OFFICIALS ONLY Sanitized - Approved For Release : CIA-RDP83-00423R001500540004-2

No.4 (Cont'd) enterprise operated by a group of relatively wealthy displaced persons, and intended to provide temporary work for their fellow refugees, as well as a source of future income for the owners.

- No.5 View taken from southeast end of Marine Prive, close to the Colaba area, and show Malabar Hill in the distance. Malabar Hill is the highest portion of land in the Bombay area. The main water supply for the city of Bombay is a reservoir beneath the Hanging Gardens, which is located approximately at midpoint of Malabar Hill. Malabar Hill is a residential area for persons of extreme wealth.
- No.9 Elevated water tank which furnishes the principle water supply to the city of Calcutta. This tanks is located on the Calcutta side of the Hooghly River, downstream from the Howrah Bridge approximately one-half mile. This picture was taken as the car was crossing a bridge over a small stream which empties into the Hooghly River.
- No.10 Shipping in the Hooghly River, from a point approximately $1\frac{1}{2}$ miles upstream from the Howrah bridge, which can be seen in background of the picture. It was noted that midstream anchorage was practiced to a large degree.
- No.11 Taken when crossing the Howrah River Bridge from the Howrah side, and illustrates the congestion of shipping in the Hooghly River downstream from Howrah Bridge.
- No.12 Taken in the vicinity of Victoria Dock in Bombay. The electric power poles shown in the righthand side of this picture are typical of the power distribution system in the Bombay area.
- No.13 Hanging Gardens, which cover the main water supply reservoir on Malabar Hill in Bombay. Picture shows a map of the water supply system exhibit in this part. Building shown on the extreme right is a portion of the main pumping station. If this picture can be enlarged, the lines and inscriptions on face of the map show the supply and distribution lines to and from the water reservoir.
- No.14 Building housing bay water pumping equipment for city of Bombay. Building is located at the north end of the main water reservoir on top of Malabar Hill. (Seenin part in preceding photo) this pumping station is essential to the distribution of palatable water in the city of Bombay.

 25X1X6
- No.15 Taken in Calcutta, and shows the sit of the National Rubber Works, manufac 25X1X6 turers of molded rubber products. The factory was located in the compound at the rear of these building, which faced on Charter Rogin Avenue (Spelling of avenue uncertain)

 25X1X6
- No.16 Entrance to one of the factories in the Howrah area. the name and legend on the sign above the driveway is not decipherable.
- No.27 A building under construction, taken to show building methods prevailing throughout India. Scaffolding consists of bamboo lashed in place by rope or twine. All construction methods appear to be extremely primitive, and quality of finished construction work can be judged as fair to good, and fully adequate for the duty to be expected of the buildings.
